### 13. ALL-SEASON TIRES

**Continental Tire ● MSRP:** starting at \$128

**Info:** [www.conti-online.com](http://www.conti-online.com)

Continental was awarded the "Best New Tire and Related Product" award at SEMA for its CrossContact LX20 tire with EcoPlus Technology. The innovative low-rolling resistance tire is claimed to deliver improved fuel economy and tread wear while reducing CO2 emissions. Stopping 34ft shorter than the competition in independent wet braking tests, the LX20 is Continental's premier all-season tire for the winter months.

### 14. GOLF VR6 HOSE

**Mishimoto ● MSRP:** \$400

**Info:** [www.mishimoto.com](http://www.mishimoto.com)

Mishimoto has produced a VW Golf VR6 silicone hose kit made from a combination of high-grade silicone and heat-resistant fibers. Styling in black, blue or red, the hoses are an upgrade over OEM with increased pressure tolerances, longer life with OE fitment. There are seven hoses in total for the '95-98 Golf VR6.

### 15. AUDI S4 HOSE KIT

**Mishimoto ● MSRP:** \$620

**Info:** [www.mishimoto.com](http://www.mishimoto.com)

Mishimoto has also announced a silicone turbo hose kit for the '97-02 Audi S4. Made from a combination of high-grade silicone and heat-resistant fibers, they're available in black, blue or red, just like the VR6 hoses here. Again, silicone is a good upgrade over stock rubber hoses because they can tolerate increased boost pressure and are more resilient to oil contamination. The parts also come with a lifetime warranty.

### 16. MESH WHEELS

**ESM ● MSRP:** starting at \$175

**Info:** [www.esmwheels.com](http://www.esmwheels.com)

ESM Wheels has released its ESM-004 SL, which is a classic mesh design available in staggered 17x8" and 17x9" sizes. What's more, they're available with up to a 3" mirror-finished step-lip. The 17x8" wheel is said to only weigh 22 lb and is offered with a range of offsets and bolt patterns. Also available are black and red center caps for a custom touch.

### 17. CONCAVE WHEELS

**Vossen Wheels ● MSRP:** website

**Info:** [www.vossenwheels.com](http://www.vossenwheels.com)

Vossen Wheels has just announced it's producing a concave-designed VVSCV1 in 19x8.5" and 19x10" sizes. They're offering them in 5x112", 5x120" and 5x114.3" bolt patterns, with offsets ranging from ET15 to 55 to fit many popular Euros. The 19s are in addition to the current range of 20x9", x10.5", 22x9", x10.5" sizes that are currently available. However, the new 19s should make the wheel more accessible to our Euro community.
