01 TurboSmart Fuel Pressure Gauge

TurboSmart has debuted a new addition to their family of products, a fuel pressure gauge. This liquid-filled product, a fuel pressure gauge, fits and is compatible with other regulators using a 1/8-inch NPT port. Their FPG features an all stainless steel body and will run a range of 0-100psi (0-7 Bar). This is a must for any forced induction vehicle with an upgraded fuel system. For more visit www.turbosmartUSA.com.

02 Direct Auto Import Time Attack

Yarnal is the latest addition to the Time Attack series from DA for 2005. The multi-spoke design provides an incredible structural rigidity while allowing proper venting to the brake system. It comes in a unique carbon fiber finish with red pin striping on the lip. Available in 17 and 18 inch for most popular bolt patterns and offsets. For more visit www.dalloy.com.

03 Hankook Ventus R-63 Z222

As a successor to the track-proven Ventus R-62 Z212, and compliment to the Ventus Z214 racing tires, Hankook Tire has applied its latest motorsports technology to improve dry-grip performance by 30 percent, further enhancing the tire's handling capabilities. The profile has been developed to maximize the footprint contact patch. In addition, based on the great success in 2007-08 at Hankook DOT R-Compound tires in competition, the compound technology responsible for winning on the track has been applied in the new Ventus R-63. For more visit www.hankooktire.com.

04 Minimoto Air Diversion Plates

Improving the cooling capacity of your engine will promote superior combustion efficiency and the overall performance of your engine. All Minimoto air diversion plates are made in the USA and constructed of 5052 aluminum and are available in several finishes. Choose from a natural brushed metal or an anodized glossy black or blue to enhance the look and style of your engine bay. For more visit www.minimoto.com.
